NESA REQUIREMENTS

RoSA Eligibility

To be eligible for the RoSA, a student who leaves school at or after the completion of Year 10, but before completing the HSC, must have:

- a. Attended a government school, an accredited non-government school, a school outside NSW recognised by NESA or a TAFE NSW institute, and
- b. Participated in, and satisfactorily completed the mandatory curriculum requirements for Years 7–10, and
- c. Complied with any other regulations or requirements mandated by the Minister or NESA.

Meeting mandatory curriculum requirements for the RoSA

- 1. The RoSA is available to eligible students who leave school before completing the HSC.
- 2. For students to satisfactorily complete mandatory curriculum requirements to be eligible for the award of the RoSA, schools must provide courses of study for each student in each of the 8 key learning areas (KLAs) for secondary education: English, Mathematics, Science, HSIE, Technological and Applied Studies, Languages other than English, Creative Arts, and PDHPE.

3. Schools must:

- a. provide courses of study for English, Mathematics, Science, HSIE and PDHPE in each year of Years 7 to 10, and
- b. teach each course of study in accordance with the current syllabus, and
- c. ensure that the outcomes and content of all the courses are programmed, and
- d. timetable the mandatory curriculum for the indicative hours specified in the syllabus.

Determining Grades NESA Requirements

Schools must have policies and procedures for determining grades

- 1. Schools must have policies and procedures for determining grades that will be submitted to NESA. The policies and procedures must include:
 - a. An assessment plan for every 100-hour or 200-hour graded Stage 5 course (except for courses based on Life Skills outcomes and content, or Stage 5 VET courses)1, and
 - b. Procedures for determining grades, and
 - c. Procedures for retaining student work samples.

ENTRY INTO YEAR 11: Students who have completed Year 10 and RoSA requirements

- 1. Students may enter Preliminary courses if they have satisfactorily:
 - a. Completed Year 10, and
 - b. Completed the required courses of study needed for the award of the RoSA.
- 2. Eligibility for the completion of Year 10 for the purpose of entering Preliminary courses is considered at the time of entry, and is separate from achieving the RoSA.

Criteria for satisfactory completion of a course

- 1. A student is considered to have satisfactorily completed a course if, in the principal's view, there is sufficient evidence that the student has:
 - a. Followed the course developed or endorsed by NESA; and
 - b. Applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
 - c. Achieved some or all of the course outcomes.
- 2. NESA does not set a minimum attendance for the satisfactory completion of a course. The principal may determine that, as a result of absence, the above course completion criteria might not be met. Clearly, such absences are serious and principals must give students early written warning of the consequences of non-completion of course requirements. The warning must relate the student's absence to the non-completion of the course requirements.

KKHS PROCEDURES

Determining ROSA Grades at the end of Year 10

School Based Assessment is used to Award a Grade in Each Course.

The grade awarded in each course will be based on achievement measured at points throughout the course in Year 10. Measuring achievement at points during Year 10 provides a better indication of student achievement than a single examination and also provides the opportunity for the student to demonstrate their highest level of achievement.

Assessment tasks may include tests, written or oral assignments, practical activities, fieldwork and projects.

- For every course, NESA has developed Course Performance Descriptors which describe five levels of achievement from A to E. (Mathematics has 10 levels of achievement A10 E1).
- Students will receive the grades which best relate to the description of their achievement according to the Course Performance Descriptors in each course.
- Where a student has failed to satisfactorily complete a course, an 'N' will be awarded.
- The general experience courses of non-elective Music, Language, Creative and Performing Arts and Technological and Applied Studies will be graded as 'S' satisfactorily completed or 'N' not satisfactorily completed.

Schools are responsible for awarding each student a grade (A, B, C, D, or E) for each NESA Developed Course to summarise the student's achievement in any 100 hour or 200 hour course completed in Stage 5. The grade awarded for each course is reported on the student's Record of School Achievement.

Teachers use these Stage 5 course performance descriptors to determine Record of School Achievement grades for each course. The descriptors have been developed from NESA's general performance descriptors, and provide a more complete description of typical performance in each course at a grade level.

Determining Grades

During the course, teachers collect information on the achievement of each student. To allocate a grade to a student at the end of the course, teachers make a judgement as to which grade descriptor best describes the achievement of that student.

Students should be given the opportunity to demonstrate their maximum level of achievement relative to the course performance descriptors.

Values and attitudes are an integral part of learning.

Applying the Course Performance Descriptors

Teachers use their professional judgment in applying the course performance descriptors. It is not intended that the course performance descriptors represent a checklist or provide a comprehensive description of student performance at each grade level.

The descriptor that provides the best overall description of the student's achievement will determine the grade awarded.

The samples of student work that are provided on the Assessment Resource Centre website clarify the standards described in the course performance descriptors. They illustrate the quality of work typically produced by students who receive each grade.

Areas for Assessment

The areas for assessment for each course provide a framework for structuring an assessment program and may be used for reporting student achievement. They are derived from the course objectives and are linked to the course outcomes. They can be used as organisers for assessment of student achievement.

Good assessment practice involves designing quality assessment activities that enable students to demonstrate their achievements. Teachers use the areas for assessment when designing an assessment activity, to ensure it is assessing performance in relation to a grouping of outcomes.

General Performance Descriptors

The general performance descriptors describe performance at each of five grade levels:

Grade	Description
A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
В	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
С	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
E	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Disability Provisions

The school assesses applications from students with disabilities in order to provide eligible students with practical support in tests and examinations. Applications may be made by students for Stage 5 Assessment tasks.

For more details, refer to the NSW Education Standards Authority's website: http://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/disability-provisions or contact the school Deputy Principal.

ASSESSMENT PROCEDURES

Notification

Students will receive a written notification of an assessment task at least **two weeks** prior to the due date of the task. Students will sign and date a register to acknowledge receipt of this assessment notification. If students are absent on the day an assessment task notification is handed out, they are responsible for obtaining a copy of it. No extra time will be given to a student for a task because they did not receive the notification in class. Teachers will upload copies of the task notification onto CANVAS to ensure all students can access copies throughout the assessment period.

Submission

It is the responsibility of students to ensure that they complete assessment tasks at the scheduled time and date or that they complete a serious attempt at assessment tasks and submit them at the designated time on or before the due date. Assessments may be required to be handed in, submitted via CANVAS or submitted digitally by a specified time or by 3pm of the due date. Notifications for each task will clearly outline the required means of submission.

When needing to be handed in, assessment tasks will be accepted by the course teacher during the class period for that subject on the due date. If the teacher is absent or unavailable, tasks must be handed to the Head Teacher responsible for the course.

Tasks must never be left on a desk or table for collection by the teacher or handed to a casual teacher. They must be collected by the teacher and students must sign to reflect that they have been handed in. Tasks submitted on-line will be date and time stamped to ensure processes are followed.

Assessment task submission and or completion takes priority over school events such as: excursions, sporting or school representation and VET work placements that fall outside of the defined work placement periods. It is the student's responsibility to bring to the attention of their class teacher any impending conflicts. This is clearly stated in the Additional Information section on every assessment task notification.

Tasks submitted after the due date without a successful Student Appeal Form will receive an automatic zero mark.

Late or non submission of tasks

If a student fails to complete a task specified in the assessment program without a valid reason (e.g. illness) the student will be issued with a **zero mark**.

If tasks prepared at home are not submitted by the time stipulated on the notification they will be regarded as late unless a Student Appeal Form is submitted. Late submission will result in a **zero mark** being awarded for the task.

Students are expected to make a serious attempt at assessment tasks when submitting late or otherwise. Students will receive feedback about their response, however, the student would still have a zero mark recorded against their performance for the task.

Failure of technology on the due date will not be accepted as a valid reason for late submission.

Where there is no valid reason for not completing an assessment task, a warning letter will be issued indicating the nature of the work not completed and the future action required of the student to resolve the situation. It is important that students complete this task and resolve the warning letter to develop the skills required of the course.

To meet the requirements of the Stage 5 course, student must make a genuine attempt at assessment tasks, which contribute to an excess of 50 percent of available marks in that course. Students who are absent from an assessment task or who fail to complete a task by the due date absence are ineligible for the award of a mark for that task.

Extensions may only be granted where there is a legitimate reason for absence approved by the Head Teacher or Deputy Principal. This will only occur after following the appeals process.

Non Serious Attempts

NESA expects students to attempt all assessment tasks that are set. Students who do not make a serious attempt at assessments may not receive a mark for the assessment concerned and parents will be contacted for a meeting. Any student identified as making a non-serious attempt or a non-attempt will be asked to justify their response with the teacher and Head Teacher of the subject.

Non-serious attempts include frivolous or objectionable material. Students who provide answers to questions in a language other than English (unless specifically instructed to do so) will have zero marks awarded.

Non-attempts include those where only multiple-choice questions are attempted.

Appeals

Students absent (due to illness or approved leave such as work placement or other school business) from school on the day an assessment task, test or examination is due, must complete and submit a Student Appeal Form within **two days** after their return to school and **no longer than two weeks** after the initial due date of the task, test or examination. The Student Appeal Form may be lodged with either their Class Teacher or the Head Teacher of the faculty. The Student Appeal Form will be discussed with the Stage 5 Deputy Principal and the student will be informed of the decision.

In exceptional circumstances (eg where undertaking a substitute task is not feasible or reasonable, or where the missed task is difficult to duplicate), the Principal or Deputy Principal should authorise the use of an estimate based on other appropriate evidence.

If the student is absent due to illness, evidence of the illness on that date **must** be provided. When the student knows ahead of time that they will be absent for an assessment task they should advise the class teacher or Head Teacher prior to the date to complete the task at an agreed time. Where possible, this should be made at least two weeks before the assessment is due.

If the appeal is upheld, students will complete the task set for the assessment they have missed.

If there is no valid reason for failing to complete an assessment task, a zero mark must be recorded for that task.

Malpractice

All work presented in assessment tasks and external examinations (including submitted works and practical examinations) must be a student's own or must be acknowledged appropriately. Malpractice, including plagiarism, could lead to students receiving zero marks and will jeopardise their Stage 5 RoSA results.

Malpractice includes (but is not restricted to) the following:

- copying someone else's work in part or in whole, and presenting it as their own
- using material directly from books, journals, CDs or the internet without reference to the source
- building on the ideas of another person without reference to the source
- buying, stealing or borrowing another person's work and presenting it as their own
- submitting work to which another person, such as a parent, coach or subject expert, has contributed substantially
- using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement
- paying someone to write or prepare material
- breaching school examination rules
- using non-approved aids during an assessment task
- contriving false explanations to explain work not handed in by the due date
- assisting another student to engage in malpractice

In the case of suspected plagiarism, students will be required to provide evidence that all unacknowledged work is entirely their own.

Students are expected to conform to the highest standards of academic integrity and ethical scholarship. If a student is deemed to be guilty of malpractice, a zero mark may be awarded for the section of the task or for the whole task depending on the amount found to be plagiarised. This may be recorded on the NESA malpractice register on the NESA website. If the results of an assessment task are found to be invalid or unreliable for the entire cohort due to malpractice, then an alternative assessment task may be given.

Marking of Assessments

Assessment tasks should be marked and returned to students within a two week period. Meaningful feedback about what they have demonstrated and what they need to do in order to improve their performance needs to be given to students as well as their rank and mark for the task. In the cases where there is more than one class for the subject, the task should be marked by one teacher or double marked to maintain consistency of judgement. Teachers must keep copies of work samples from all assessments that reflect the distribution of grades for that task. Samples must be kept on SharePoint.

N-Determinations

The Assessment Certification and Examination (ACE) website states that to meet the <u>course completion</u> criteria, principals must have sufficient evidence that a student has:

- followed the course developed or endorsed by NESA; and
- applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- achieved some or all of the course outcomes.

In the case of competency based courses, it is a matter for the Principal to determine whether the attempts made by the student to complete the course are genuine. While NESA does not determine minimum attendance requirements, Principals may determine that, as a result of absence, the course completion criteria have not been met.

Submission of Projects, Major Works and Performances

The development and selection of student projects, major works, exhibitions and performances **must satisfy health and safety requirements**. They must:

- be undertaken within the operating guidelines and directives of education authorities and/or schools
- recognise and reflect relevant state and national legislation, regulations and standards including those relating to workplace health and safety (WHS), animal welfare, dangerous goods, hazardous substances and weapons
- take account of the needs of students, teachers, markers and others, including the general public.

Any Stage 5 project that might be considered dangerous to health or safety may not be marked.

Prohibited weapons, replicas and related articles

Student projects, major works, bodies of work, exhibitions and performances should not produce, display or use prohibited weapons, replicas, or related articles. Plastic toys and other objects that would not be mistaken for real weapons are permissible. Students using such toys to represent a weapon in a performance must advise the markers before they begin their performance.

Examples of prohibited weapons, replicas and related articles include, but are not limited to, firearms, knives, cross-bows, archery bows and arrows, catapults, kung fu sticks or nunchaku, batons, spear guns, handcuffs and self-defence sprays.

For many students, their performance or submitted works present an opportunity to explore an issue of personal interest and to express ideas and opinions. While it is understood some performances and submitted works challenge established views, the teacher will ensure that work submitted does not cause offence. Teachers should not be confronted by works and performances that the general community would find offensive.

EXAMINATION RULES FOR STUDENTS

It is necessary to have set exam rules to ensure that our Examinations are fair for all students.

Read the following Kurri Kurri High School Examinations Rules very carefully so you are aware of your responsibilities.

- 1. Students are responsible for knowing their own exam timetable, for arriving on time for an exam and for ensuring they attempt the correct exam paper. A student who misses an exam as a result of misreading the exam timetable will receive a zero mark.
- 2. All students are to arrive at least 15 minutes before the starting time of the paper. No student will receive extra time if he/she arrives late for an examination.
- 3. Students will sit in rows as instructed by the supervising teacher.
- 4. Mobile phones are not permitted in the examination room (GYM). Mobile phones must be left in bags and must be turned off. Students who have a mobile phone in an exam will receive zero for that paper.
- 5. All bags, books etc. must be left outside the exam room (GYM) in the designated area. Food and drink are not permitted in the examination room.
- 6. Students should provide all the necessary equipment required for each exam. E.g.: pens, pencils, ruler, calculator, eraser etc. Borrowing of equipment is not permitted during the examination.
- 7. Pencil cases are not permitted in the exam room (GYM).
- 8. Behaviour during the exam must not disturb other students and must be in line with school expectations. Eating and drinking, talking, shuffling of papers, turning around, creating noises etc. is not permitted. A student who persists in causing a disruption of any kind may be removed from the exam and have his/her exam paper cancelled.
- 9. A student suspected of, or caught cheating during an exam will have his/her exam paper taken. Parents will be contacted and disciplinary action in accordance with the school's policy will occur.
- 10. You must see Stage 5 Deputy if you miss an exam for any reason. Examinations are to take priority over all other activities such as; sport, medical appointments and driving tests. In certain cases, special consideration may be given for students who have an exceptional reason to miss an exam paper. Such students will need to produce certain documentation. Except in the case of unexpected illness or misadventure, an Appeals Form must be completed before the examination. It is the student's responsibility to complete an Appeals Form If an exam is missed.
- 11. A student does not make a serious attempt in an examination may receive a zero. This includes answers that contain frivolous or objectionable material.
- 12. Students are not permitted to leave the examination room prior to the completion time of the paper. Students who complete their work early should spend their time checking through their paper and ensuring that they have done their best.
- 13. No examination material may be taken from the exam room (GYM) by any student.
- 14. It is the responsibility of each student to ensure that all exam answers are collected at the conclusion of the examination.
- 15. If a student does not attempt a question in an exam paper he/she must still submit a response that states: e.g. Question X Not Attempted.
- 16. Students are required to wear full school uniform for each examination.

MANAGING ASSESSMENT SCHEDULES

Advice to Students in Managing Assessment Schedules

- Be positive and optimistic.
- Ensure that you are familiar with the Assessment Schedules relevant to your pattern of study.
- As an active learner who exercises self-regulation, take responsibility for managing your assessment schedule and meeting deadlines. The assessment schedule for each term has been mapped out for you. Use the assessment calendar and a diary or electronic calendar to help with your organisation.
- Keep a record of tasks completed for each subject so that, at any given time, you know exactly what proportion of your course assessment has been completed and how much remains.
- Seek feedback from teachers if you are unsure about what you need to do to improve and make further progress.
- Open communication helps to minimise misunderstanding and confusion. Communication regarding assessment tasks is managed by each faculty the Classroom Teacher in the first instance, and then the Head Teacher of the subject concerned.
- If issues with your health and wellbeing are impacting your learning, contact your Teachers and Year Advisers so that guidance and support can be discussed.
- Inform your teacher if you know that you will be absent before a task is due and hand in the task before time.
- Submit an Illness/Misadventure Appeal Form if you are unable to submit the task as required on the due date due to illness or misadventure.

Kurri Kurri High School Year 10 English Assessment Schedule 2025

Course: 10 English Head Teacher: S.Golding

	Task 1	Task 2	Task 3	Task 4
Due Date/ Date of Task	Term 1, Week 9	Term 2, Week 7	Term 3, Week 9	Term 4, Week 1
Topic	Journeys – an area of study	Distinctive visuals/voices	All topics	What lasts forever?
Name of Task	Analytical Piece	Timed Analytical Piece	Examination	Portfolio
Brief Description	Students will read and analyse a collection of poems from a particular poet, learning to write longer analytical responses.	Students will read and analyse a prose text, learning to write longer analytical responses.	Students will read and analyse a series of short texts, learning to write both short and longer analytical responses.	Students have worked through a variety of texts (or excerpts from a significant text) throughout this topic, learning to respond in varied ways to build their confidence as English students.
Components	Students will continue to refine their analytical writing skills, focusing on the development of argument over a longer response and the inclusion of well-chosen and carefully sequenced textual references. They use the writing strategies taught at school to leverage their responses.	Students will continue to refine their analytical writing skills, focusing on the development of argument over a longer response and the inclusion of well-chosen and carefully sequenced textual references. They use the writing strategies taught at school to leverage their responses. This task will be completed in timed conditions in order to prepare students for the rigour of Stage 6.	Students will continue to refine their analytical writing skills, focusing on the development of both short answer responses to unseen material and the crafting of argument for longer responses. All responses will focus on the inclusion of well-chosen textual references.	Students will refine a portfolio of work that they have added to throughout this topic. They will select one piece that they would like to edit and publish as part of this process.

	Task 1	Task 2	Task 3	Task 4
Due Date / Date of Task	Term 1 Week 10	Term 2 Week 6	Term 3 Week 4	Term 3 Week 9
Topic	Financial Mathematics / Algebraic Techniques / Equations	Trigonometry	Data Analysis / Variation & Rates of Change	All previous topics + Non Linear Relationships
Name of Task	Term 1 Assignment & Quiz	Trigonometry Assignment & Quiz	Stage 5 Portfolio	Year 10 Examination
Brief Description	In this assessment students will complete an assignment for Term 1 topics and then complete an in class quiz on the day of submission. Students will be able to use their completed assignment as reference material during the quiz to assist their recall of key concepts. Students must provide their own scientific calculator for this task.	In this assessment task, students will create a variety of problems related to their study of Trigonometry in Term 2. Students will then provide fully worked solutions and clear labelled diagrams for each problem. Students will be able access print and online resources to complete this task. This task will be completed at home and handed in via hard copy.	In this assessment task, students will create a portfolio of tasks related to their learning throughout the year. Students will create a summary for each topic in a provided template. They will also complete a series of short quizzes using the Canvas platform. Class time will be allocated for the quizzes while students will be expected to complete their summary tasks at home.	Students will complete a formal examination in class time under test conditions. Students will be able to use a reference sheet during this task and will participate in targeted lessons to create a quality reference sheet in the lead up to the examination. Students must provide their own scientific calculator for this task.

Course: History & Geography Head Teacher: A Stewart

	Task 1	Task 2	Task 3	Task 4	Task 5
Due Date/ Date of Task	Term 1, Week 8	Term 2, Week 4	Term 2, Week 10	Term 3, Week 6	Term 3, Week 9
Topic	HISTORY: Core Study: Rights and Freedoms (Depth Study 4)	GEOGRAPHY- Sustainable Biomes	HISTORY: Depth Study 5a: Popular Culture	GEOGRAPHY- Environmental Change and Management	HSIE: All topics
Name of Task	Essay	Case Study	Source Analysis	Fieldwork Task	Yearly Exam
Brief Description	Students will conduct brief research to locate and select historical evidence relevant to the rights of freedoms for either Aboriginal and Torres Strait Islanders or African-Americans in order to draft and refine an essay, integrating historical evidence, to evaluate how activism by key individuals and groups have changed rights and freedoms in Australia and modern world.	Students will research a case study on a biome in one country. They will then use the information that they gather to answer a series of short answer questions on the features and spatial distribution of the biome, its productivity and evaluation of factors which impact this. Students will use this analysis to recommend a management strategy for improving the sustainability and productivity of the biome.	Students will analyse a range of sources in class. They will then answer a series of short answer questions which will ask them to either evaluate the source or use it as evidence of their knowledge. Some questions will focus on sources studied in class and some will focus on unseen sources.	Students will work in groups to investigate a case study of local environmental change and management by gathering and processing data. Students will then independently write an evaluation analysing their data and possible management strategies. They will critically reflect on their investigation methods and suggest future improvements.	Students will sit a combined HSIE exam, assessing key skills; and knowledge and understanding for both Geography and History.
Components	Research Essay	Research Short answer responses	Source Analysis Short answer responses	Fieldwork Investigation Booklet Short answer responses	Multiple Choice Short answer responses Extended responses

	Task 1	Task 2	Task 3	Task 4
Due Date/ Date of Task	Term 1 Week 8	Term 3 Week 2	Term 3 Week 6	Term 3 Week 7
Topic	Respectful Relationships	Netflix and Chill : Sexual Health	Invasion Games	Road Safety
Name of Task	Dance Practical and TEEEC Paragraph	10.1PDHPE Podcast differentiated task Graph analysis and Cornell Note Taking	Invasion Games	Road Safety Campaign
Brief Description	Students will work collaboratively to choreograph and perform a group dance routine. Student's individual submission will be a TEEEC paragraph written under timed conditions.	10.1PE Students will work collaboratively to create a Podcast based on sexual health issues for young people. 10 PE: Students will be provided with stimulus material and use their understanding to interpret graphs. They will also use their summarizing skills to use comell note taking strategy.	Working collaboratively students will create an invasion game. The task will include a scaffold, instruction game card and a student led demonstration with the class. Students will also complete a peer critique on the skill level of a peer during this unit of work.	Students work collaboratively to create a Road Safety Campaign relevant for a road safety issue in our local community. Students will individually submit an Infographic on a road safety issue.
Components	Knowledge and understanding related to respectful relationships. Self management and movement skills	Knowledge and understanding related to sexual health concepts Skills in interpreting graphs. Skills in summarizing information.	Self Management, Interpersonal and movement skills .	Knowledge and understanding of Road Safety. Skills in summarizing, visual literacy, self management and interpersonal skills.
Syllabus Outcomes Assessed	PD5.1 assesses their own and others' capacity to reflect on and respond positively to challenges PD5.3 analyses factors and strategies that enhance inclusivity, equality and respectful relationships PD5.9 assesses and applies self-management skills to effectively manage complex situations PD5.10 critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts PD5.11 refines and applies movement skills and concepts to compose and perform innovative movement sequences	PD5.2 researches and appraises the effectiveness of health information and support services available in the community PD5.6 critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity	PD5.9 assesses and applies self-management skills to effectively manage complex situations PD5.4 adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts	PD5.6 critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity PD5.7 plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities PD5.9 assesses and applies self-management skills to effectively manage complex situations

Course: Child Studies Head Teacher: T Gavenlock

	Task 1	Task 2	Task 3
Due Date/ Date of Task	Term 1 Week 10	Term 2 Week 9	Term 3 Week 10
Topic	Growth and Development	Play and The Developing Child	Family Interactions
Name of Task	Stepping Stones	Sustainable Toy	Parenting Styles Research Task
Brief Description	Students will collaborate to research the developmental milestones for children from birth to 5 years to create a website educating parents/carers on the importance of healthy development in young children. Individually, Students will also take care of a baby egg, recording the activities completed with their egg to promote healthy development.	Students will plan and create a toy suitable for a young child using sustainable products. The toy must be created using recycled, sustainable items. Students will need to journal the development of their toy and submit a written component of the task.	Students will undertake a project to explore parenting styles in Kurri Kurri and the impacts this has on upbringing. Stage 6 skills will be incorporated into this task of creating questions, distributing and collecting data and writing a report based on the findings.

Topic	Food Service and Catering	Food for Specific Needs	Food Trends
Name of Task	Yum Town Pop Up Eatery	Dietary Requirements	Grazy Dayz Snap Blog
Brief Description	Students will investigate and collect a variety of food truck menus which they will evaluate against set criteria. Students will develop their own pop-up restaurant plan from the name, what its main features are as well as its signature dish. Students will produce their signature dish which is modified to serve multiple numbers of customers.	Students will research a dietary disorder and plan and prepare an individual meal that is safe for a specific dietary need. Students will investigate nutrient reference values to understand an individual's needs for a specific dietary disorder. Students will outline how the dish prepared meets the needs of the individual and discuss the safety and hygiene around the preparation of the dish.	Students need to create a visually appealing digital snap blog. They will be required to do extensive research to demonstrate their understanding of food photography styling, food safety and contemporary food trends. Students will produce their own platter which will feature in their blog.

Subject: Industrial Technology Timber

3 5 4 6 8 10 Title / Unit: Timber Joints Outcomes: IND5-2, IND5-3, IND5-4, IND5-6, IND5-7, IND5-9, IND5-10 Content Focus: Students will demonstrate their practical knowledge through the creation of specific joints with a focus on hand tool skill development. These joints will be the basis of future projects. Students will also compile aspects of a portfolio describing the construction of the joints and current and emerging timber technologies. In doing so they will develop skills based around hand tools, measuring, marking out and joints. Preparation skills for Stage 6: knowledge and understanding of safe and cooperative work practices and of the need for a safe and cooperative work environment. Knowledge and skills in producing quality products. Knowledge and skills in communication and information processing related to the industry focus area. AT1 – Timber Joints Portfolio 30% 3 5 4 6 7 8 9 10 Title / Unit: Minor Project Outcomes: IND5-1, IND5-2, IND5-3, IND5-5, IND5-7 Content Focus: Students will be provided with workshop drawings from which they can choose a project they would like to complete to demonstrate their practical skills. Students will also compile aspects of a portfolio describing the construction of the project. In doing so they will develop skills based around hand tools, power tools, assembly processes, laser cutting, and finishing techniques. Preparation skills for Stage 6: knowledge and understanding of safe and cooperative work practices and of the need for a safe and cooperative work environment. An appreciation of quality products and the principles of quality control. Knowledge and skills in communication and information processing related to the industry focus area. Knowledge and understanding of the focus area industry and of manufacturing processes and techniques used by industry AT2 - Minor Project Portfolio 40%

Title / Unit: Let me be your star! - Rock Music

Outcomes: 5.1, 5.3, 5.7, 5.8, 5.9, 5.10, 5.11, 5.12

Content Focus: In this unit, students will study rock music through listening and performance activities. Students will be creating a setlist for MADD Night in Week as they apply all their skills and knowledge learnt throughout the year to perform at their own Kurri Kurri High School gig

Preparation skills for Stage 6:

Performing - Students will have experiences in:

- Singing*
- Playing instruments and other sound sources both melodic and non-melodic
- Accompanying
- Interpreting different forms of notation

*If student selected

Listening - Students will have experiences in:

- listening, observing, discussing and responding in oral and written form to a range of repertoire.
- listening, observing, discussing and responding in oral and written form to how composers have used the concepts of music in their works

Kurri Kurri High School

Year 10 Music Assessment Schedule 2025

Course: Music Head Teacher: A. Harris

	Task 1	Task 2	Task 3
Due Date/ Date of Task	Term 1 Week 10	Term 2 Week 9	Term 3 Week 10
Topic	Beats and Bands	Baroque 'n' Roll	Mullets and Meat Pies
Name of Task	Viva Voce & Small Ensemble Performance	Composition in the Baroque style	Listening Analysis & Australian Music Performance
Brief Description	Students will select and perform a piece of music that is representative of the Music for Small Ensembles topic. They will present a viva voce to demonstrate their deep knowledge and understanding of musical concepts and their use in their selected piece.	Students will compose a piece of music in the baroque style using composition software.	Students perform a solo or ensemble performance and complete a listening analysis.
	Performance and Listening	Composition	Performance and Listening
Components	Knowledge and understanding related to performance skills representative of music for small ensembles and development of concepts of music knowledge through listening analysis component.	Knowledge and understanding related to composition skills using software. Development of skills related to melody and harmony relative to the studied topic.	Knowledge and understanding related to performance skills through an Australian Music focus. Development of listening skills through completing a listening analysis.
Syllabus Outcomes Assessed	Performance (20%) - 5.1, 5.3 Listening (20%) - 5.7, 5.9, 5.10	Composition (30%) - 5.4, 5.5, 5.6	Performance (20%) - 5.2, 5.3 Listening (10%) - 5.7, 5.8
Skills Assessed	Performing: Playing instruments and other sound sources both melodic and non-melodic Listening: listening, observing, discussing and responding in oral and written form to a range of repertoire, and how composers have used the concepts of music in their works	Composition: Experimenting with computer-based technologies to create compositions, notating compositions using non-traditional notation, which may be self-devised, exploring, experimenting, improvising, organising, arranging and composing using a variety of sound sources and movement activities.	Performing: Interpreting different forms of notation, accompanying Listening: Listening, observing, discussing and responding in oral and written form to how composers have used the concepts of music in their works.

	Task 1	Task 2	Task 3	Task 4
Due Date/ Date of Task	Term 1 Week 10	Term 2 Week 2	Term 3 Week 3	Term 3 Week 10
Topic	Physical Activity and Sport in Society - Australia's sporting Identity	Physical Activity and Sport in Society - Australia's sporting Identity (Practical)	Enhancing Participation and Performance - Coaching	Enhancing Participation and Performance – Coaching (Practical)
Name of Task	Australia's sporting Identity	Australia's Sporting Identity	Sports Coaching	Sports Coaching Practical
Brief Description	Students create an engaging presentation on an Australian sporting icon that can be shared on range of media platforms	Students will participate in a range of physical activities with the purpose of developing their collaborative, critical thinking, creativity and communication skills in a fun and challenging environment.	This course promotes a case study approach to investigating sports coaching. Students conduct research to gather information on skill development, strategies and tactics to propose strategies to improve a sporting performance. How can I improve the performance of athletes?	Students are expected to collaborate with others to demonstrate their motivational and behavioural skills and tactical ability towards a diverse range of physical activities. You will become more aware of how to modify activities and the importance of participation.
Components	Knowledge and understanding of a historical timeline of Australian sports and how it has changed over time. A player profile on influential Australian sportsmen/women from a range of different backgrounds	Physical Literacy: Motivational and Behavioural Skills – (includes persistence, initiative and working independently in physical activity settings with a focus on the values, attitudes and behavioural skills to plan for and participate in lifelong physical activity). Personal and Social Attributes- (includes safety, cooperation, communication and conflict resolution within physical activities).	Knowledge and understanding of Tactical analysis, Fundamental skills and coaching plans. ICT skills through development of a google site. FoW- Information reports, Visuals FOR – RAP, Monitoring, Peer review or Gallery Walk	Physical Literacy: Motivational and Behavioural Skills – (includes persistence, initiative and working independently in physical activity settings with a focus on the values, attitudes and behavioural skills to plan for and participate in lifelong physical activity). Tactical Movement - (includes understanding of physical activity contexts, rules and tactics. This understanding is used to plan for tactical movement and demonstration of critical and creative thinking through movement).

Syllabus Outcomes Assessed	PASS5-3 discusses the nature and impact of historical and contemporary issues in physical activity and sport PASS 5-4 analyses physical activity and sport from personal, social and cultural perspectives PASS5-8 displays management and planning skills to achieve personal and group goals	PASS5-2 analyses the benefits of participation and performance in physical activity and sport PASS5-5 demonstrates actions and strategies that contribute to active participation and skillful performance PASS5-7 works collaboratively with others to enhance participation, enjoyment and performance PASS5-9 performs movement skills with increasing proficiency	PASS5-5 demonstrates actions and strategies that contribute to active participation and skilful performance PASS5-6 evaluates the characteristics of participation and quality performance in physical activity and sport PASS5-8 displays management and planning skills to achieve personal and group goals	PASS 5-5 demonstrates actions and strategies that contribute to active participation and skilful performance. PASS 5-7 works collaboratively with others to enhance participation, enjoyment and performance of others.
Skills assessed	PASS Communicating Planning Literacy -Summarising Numeracy -Graph analysis	PASS Decision making Moving Communication, Cooperation, inclusion, safety Self & Peer reflection	PASS Collaboration, Planning Problem- solving, Tactical analysis Literacy -Summarising, Visuals Numeracy -Graph analysis	Decision making Moving Tactical Movement Motivational and behavioural skills

Year 10 Student Interest Project Assessment Schedule 2025

Course: Student Interest Project

	Task 1	Task 2	Task 3
Due Date/ Date of Task	Term 1 Week 10	Term 2 Week 9	Term 3 Week 10
Topic	Sparking Curiosity	How far can I go?	Look at this!
Name of Task	Project Proposal and Plan	Research Report/Annotated Bibliography	Practical Implementation & Presentation
Brief Description	Students identify an area of interest and reflect on their strengths and prior knowledge. They set learning goals, conduct preliminary research, and select a specific topic. They develop a research proposal and a project management plan, outlining stages, steps, and resources. Throughout the process, students seek and respond to feedback on their topic, proposal, and final product.	Students select an area of interest, build on prior knowledge, and set clear goals for their research. They develop research questions, conduct preliminary research, and create a project proposal with a management plan. Using safe and ethical research methods, they refine concepts, explore perspectives, and draw conclusions. They design a product to showcase their knowledge, applying timemanagement and problem-solving strategies. Throughout the project, they communicate respectfully, seek feedback, and adapt as needed, documenting their progress and reflecting on the impact of their findings.	Students finalise their product, choosing how to present it and communicate their learning to peers and teachers. They provide evidence of their knowledge, skills, and research connections. By reflecting on and applying feedback, they refine their product and presentation. They plan how to engage different audiences, such as the school or community, while respecting cultural protocols. Throughout, they demonstrate the impact of feedback and invite further input. Some may also suggest future directions for their project.
Components	Developing a concept and communicating the idea	Investigating and managing a project and ways of working. Communicating knowledge for better understanding.	Communicating knowledge to audience allows students to showcase skills learnt through research.

	ST5-CON-01 - Explains connections between concepts and ideas in areas of knowledge	ST5-CON-02 - Develops and justifies project concepts and goals	ST5-CON-01 - Explains connections between concepts and ideas in areas of knowledge
	ST5-CON-02 - Develops and justifies project concepts and goals	ST5-INV-01 –Plans and Conducts research to collect and synthesize information	ST5-COM-01 - Communicates concepts and understanding for a range of purposes, audiences and contexts

Title / Unit: Animation Art

Outcomes: 5.1, 5.6

Content Focus: In this unit, students will create a stop motion animation using 2D or 3D materials. They will explore the process of storyboarding and creating a short animation through the study of renowned animation artists and direct instruction. Students will learn about and apply photographic, film and animation techniques.

Preparation skills for Stage 6: Use of a process diary to plan artworks using sketches and annotations, application of understanding of the Conceptual Framework, working toward resolution of work through technical sensitivity and refinement, develop a personal aesthetic through experimentation and reflection on own work and the work of others.

4 Title / Unit: Ins and Outs

In this unit, students investigate the principles of design in relation to interior and exterior spaces. They are introduced to a variety of popular interior design styles and explore architectural concepts. Students will access industry resources and information to enhance their understanding of design techniques. They develop their understanding of the conceptual framework by considering the collaborative relationships between the designer, client, product and context.

Outcomes: 5.1,5.4, 5.5, 5.7

Content Focus: Space-Time Design; Structural and Subjective Frames; The Conceptual Framework; Design Practice.

Preparation skills for Stage 6: Use of a process diary to plan designs using sketches and annotations. Application of understanding of the Conceptual Framework.

Kurri Kurri High School Year 10 Visual Design Assessment Schedule 2025

Course: Visual Design Head Teacher: A.Harris

	Task 1	Task 2	Task 3
Due Date/	Term 1	Term 2	Term 3
Date of Task	Week 10	Week 9	Week 10
Topic	That's So Graphic	Shut Up and Take My Money	Entirely Attire
Name of Task	Graphic Design and Analyses and Interpretations	Product Design and Promotion	Wearable Design and Research Task
Brief Description	Students use the elements and principles of design to create a graphic design artwork which communicates meaning. They then use 2D materials and techniques to adorn a 3D object with their design. The Frames are used to analyse and interpret the work of graphic designers from different perspectives.	Students develop their knowledge of the elements and principles of design in relation to products, packaging and advertising. They use 3D materials and techniques to create a prototype of a designed object, then develop digital promotional materials using ICT. Additionally, students create a promotional advertisement of the designer/person/character who inspired their 3D form.	Students explore the possibilities of the body as a site for wearable designs. Appropriation is used to create wearable items that are culturally respectful. Students consider trends and conduct research investigating changes and developments in the style of specific wearables over time.
Components	Knowledge and understanding related to graphic design. Skills in 2D media	Knowledge and understanding related to object design. Skills in 3D and 4D media	Knowledge and understanding related to wearable items. Skills in working 3D media
Syllabus Outcomes Assessed	Making: 5.3, 5.5 Critical and historical studies: 5.9	Making: 5.1, 5.2, 5.6 Critical and historical studies: 5.7	Making: 5.1, 5.4 Critical and historical studies: 5.8, 5.10
Skills Assessed	Making: Make artistic choices applying 2D materials and techniques Critical and Historical Study: Applies the Frames to analyse how designers create works from various perspectives Literacy: Subject Specific Terminology	Making: Apply 3D materials and techniques to create a sculptural form. Critical and Historical Study: Communicate ideas in a visual format using designers as source of inspiration to create forms. Literacy: Cohesion	Making: Develop an understanding of 2D materials and techniques to appropriate wearable designs Critical and Historical Study: identify and explain the different types of visual design practice evidenced in movements, groups and the work of individuals Literacy: Subject Specific Terminology
