

## 2021/2022 Scope & Sequence

Faculty: CAPAL

Subject: MUSIC

Year: 12

option))

An Instrument and Its Repertoire         The purpose for this unit is to allow students to explore their chosen instrument and work on their craft as a developing musician. Students will complete a variety of learning experiences that will assist them to develop the required composition, musicology, aural and performance skills for the rest of the course. Students will demonstrate their deep knowledge and understanding of technique appropriate to their instrument through the presentation of elective 1 and a series of compositional activities.         Unit Outcomes: H1, H2, H3, H4, H7, H8, H9, H10, H11         Skills:         Performance:         Exploring various performance and expressive techniques appropriate for the studied instrument and selection of repertoire focus for elective 3.         Improvisation as a form of personal expression in performance         Composition:         Improvisation as a form of composition in free time         Communicating ideas with increasing confidence, accuracy and discrimination through the selection and organisation of sounds         Students use technologies used in the composition process to communicate ideas and demonstrate knowledge and understanding of musical concepts Aural:         Responding to unheard pieces of music through a combination of short and extended responses under timed conditions         Development of thewen sounds and making judgements about their use in a wide range of styles with reference to the concepts of music         Development of musica selected for study through a study of musical styles and genres to develop an understanding of key stylistic characteristics of various genre.		1	2	3	4	5	6	7	8	9	10	11	
experiences that will assist them to develop the required composition, musicology, aural and performance skills for the rest of the course. Students will demonstrate their deep knowledge and understanding of technique appropriate to their instrument through the presentation of elective 1 and a series of compositional activities. Unit Outcomes: H1, H2, H3, H4, H7, H8, H9, H0, H11 Skills: Performance: - Exploring various performance and expressive techniques appropriate for the studied instrument and selection of repertoire focus for elective 3. - Improvisation as a form of personal expression in performance - Development of technical skills through the performance of a variety of repertoire from different genres, periods and styles Composition: - Improvisation as a form of composition in free time - Communicating ideas with increasing confidence, accuracy and discrimination through the selection and organisation of sounds - Students use technologies used in the composition process to communicate ideas and demonstrate knowledge and understanding of musical concepts Aural: - Responding to unheard pieces of music through a combination of short and extended responses under timed and untimed conditions - Discriminating between sounds and making judgements about their use in a wide range of styles with reference to the concepts of music - Development of mind maps and mnemonics to assist in the retention of key musical concepts, terminology and characteristics required for aural responses Musicology: - Exploring and responding to music selected for study through a study of musical styles and genres to develop an understanding of key stylistic characteristics of various genre - Discus music from a variety of styles using the concepts of music to deduce their use with support from relevant musical examples Concepts of Music: Dynamics and Expressive Techniques, Pitch, Structure Assessment 1 [Wk8] Composition Activities & Elective 1 25% Outcomes: (H3, H7, H8, H0) (H1, H2, H3, H4, H5, H6, H7, H8, H9, H10, H11 as per	Ar	n Instrument	and Its Repertoir	e									
knowledge and understanding of technique appropriate to their instrument through the presentation of elective 1 and a series of compositional activities.         Unit Outcomes: H1, H2, H3, H4, H7, H8, H9, H10, H11         Skills:         Performance:            Exploring various performance and expressive techniques appropriate for the studied instrument and selection of repertoire focus for elective 3.            Improvisation as a form of personal expression in performance            Development of technical skills through the performance of a variety of repertoire from different genres, periods and styles         Composition:            Improvisation as a form of composition in free time            Communicating ideas with increasing confidence, accuracy and discrimination through the selection and organisation of sounds            Students use technologies used in the composition process to communicate ideas and demonstrate knowledge and understanding of musical concepts            Responding to unheard pieces of music through a combination of short and extended responses under time dand untimed conditions            Discriminating between sounds and making judgements about their use in a wide range of styles with reference to the concepts of music            Development of mind maps and mnemonics to assist in the retention of key musical concepts, terminology and characteristics required for aural responses         Musicology:          Exploring and responding to music selected for study through a study of musical styles and genres to develop an under	Th	ne purpose for	this unit is to all	ow students to e	explore their cho	sen instrumer	it and work on th	neir craft as a de	veloping musician. Si	tudents will comp	lete a variety of lea	arning	
Unit Outcomes: H1, H2, H3, H4, H7, H8, H9, H10, H11         Skills:         Performance: <ul> <li>Exploring various performance and expressive techniques appropriate for the studied instrument and selection of repertoire focus for elective 3.</li> <li>Improvisation as a form of personal expression in performance</li> <li>Development of technical skills through the performance of a variety of repertoire from different genres, periods and styles</li> </ul> <li>Composition:         <ul> <li>Improvisation as a form of composition in free time</li> <li>Communicating ideas with increasing confidence, accuracy and discrimination through the selection and organisation of sounds</li> <li>Students use technologies used in the composition process to communicate ideas and demonstrate knowledge and understanding of musical concepts</li> </ul> </li> <li>Responding to unheard pieces of music through a combination of short and extended responses under timed and untimed conditions</li> <li>Discriminating between sounds and making judgements about their use in a wide range of styles with reference to the concepts of music</li> <li>Development of mind maps and memonics to assist in the retention of key musical concepts, terminology and characteristics of various genic Discuss music from a variety of styles using the concepts of music to deduce their use with support from relevant musical examples</li> <li> <ul> <li>Concepts of Music: Dynamics and Expressive Techniques, Pitch, Structure</li> <li>Assessment 1                 <ul> <li>(W8)</li> <li>Composition</li> <li>(W8)</li> <li>(H3, H4, H5, H6, H7, H8, H9, H10, H1, H2, H3, H4, H5, H6, H7, H8, H9, H10, H1, H2, H3, H4, H5, H6,</li></ul></li></ul></li>												eir deep	
Skills:         Performance:         • Exploring various performance and expressive techniques appropriate for the studied instrument and selection of repertoire focus for elective 3.         • Improvisation as a form of personal expression in performance         • Development of technical skills through the performance of a variety of repertoire from different genres, periods and styles         Composition:         • Improvisation as a form of composition in free time         • Communicating ideas with increasing confidence, accuracy and discrimination through the selection and organisation of sounds         • Students use technologies used in the composition process to communicate ideas and demonstrate knowledge and understanding of musical concepts         Aural:       • Responding to unheard pieces of music through a combination of short and extended responses under timed and untimed conditions         • Discriminating between sounds and making judgements about their use in a wide range of styles with reference to the concepts of music         • Development of mind maps and mnemonics to assist in the retention of key musical concepts, terminology and characteristics required for aural responses         Musicology:       • Exploring and responding to music selected for study through a study of musical styles and genres to develop an understanding of key stylistic characteristics of various genre.         • Discuss music from a variety of styles using the concepts of music to deduce their use with support from relevant musical examples         Concepts of Music: Dynamics and Expressive Techniques, Pitch,	kn	nowledge and	understanding of	f technique appr	opriate to their i	nstrument th	rough the presen	itation of electiv	e 1 and a series of co	ompositional activ	vities.

Т	Music for Small Ensembles		Music of the 20th & 21st century
Ē	The purpose for 'Music for small ensembles' is to deepen students' knowledge of	ensemble/group performances Students will study	(See description below)
R	music of a variety of small and large ensembles of different genres through listen		
M	this knowledge to present Elective 2.	ing, musicology and performance. Statents will use	
1	<b>Unit Outcomes</b> : H1, H2, H4, H5, H6, H9, H10, H11		
_	Skills: Performance, Aural, Musicology		
	Performance:		
	- Exploring various repertoire options for selection for elective 2		
	- Development of technical skills through the performance of a variety of	repertoire from different genres, periods and styles	
	- Experimentation with different forms of technology used in the perform	ance process	
	- Ensemble skills including issues of balance, the role of an ensemble men	nber and communication skills	
	Composition:		
	<ul> <li>Improvisation as a form of composition in free time</li> </ul>		
	Aural:		
	<ul> <li>Responding to unheard pieces of music through a combination of short a conditions</li> </ul>	and extended responses under timed and untimed	
	- Analysing, deconstructing and reconstructing past examination question	is representative of music for small ensembles.	
	- Discriminating between sounds and making judgements about their use	in a wide range of styles with reference to the	
	concepts of music		
	<ul> <li>Development of mind maps and mnemonics to assist in the retention of</li> </ul>	key musical concepts, terminology and	
	characteristics required for aural responses		
	Musicology:		
	<ul> <li>Exploring and responding to music selected for study through an ensemi characteristics of various genres</li> </ul>	ble study to develop an understanding of key stylistic	
	<ul> <li>Discuss music from a variety of styles using the concepts of music to ded</li> </ul>	luce their use with support from relevant musical	
	examples		
	<b>Concepts of Music:</b> Duration, Tone Colour, Texture		
		Assessment 2	
		[Wk6]	
		Musicology viva	
		voce & Elective 2	
		25% Outcomes:	
		(H2, H4, H5, H6, H10	
		(H1, H2, H3, H4,	
		H5, H6, H7, H8, H9,	
		H10, H11 as per
